

## Digital Warehouse for Inspectors and Responders

### Greater Community Safety

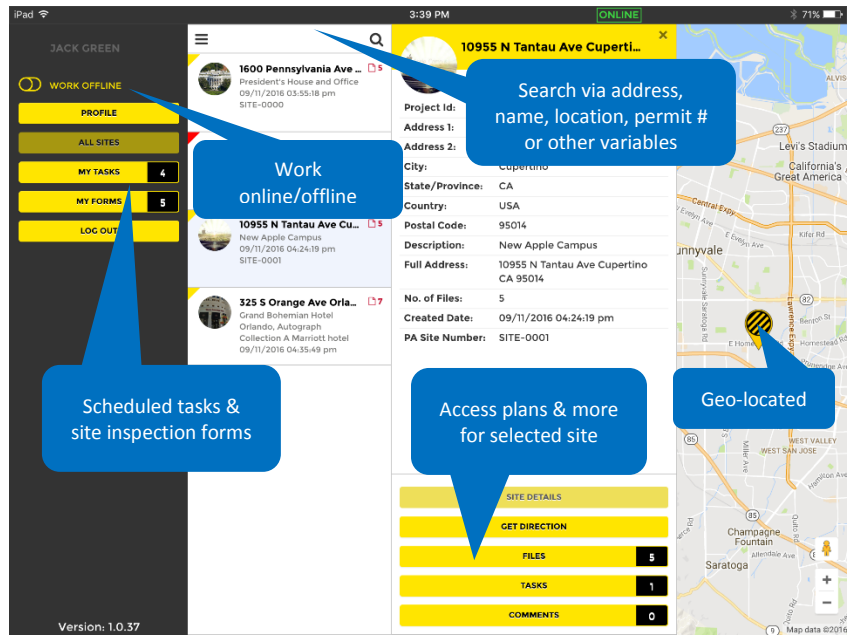

PlansAnywhere is a new ProjectDox mobile app and cloud-hosted, software-as-a service (SaaS) product. PlansAnywhere enables field access to view all key site data related to a structure by a geo-location and gives total access to a building site's history, task lists, eForms, geo-located content, and all images and documents associated with a specific building. Field personnel can do more, by having immediate information access in the field.

### Site Knowledge

#### For Inspectors and Responders

PlansAnywhere enables field access to view and record all key site information.

- Geo-located access to plans, images, documents, more
- eForms to capture inspection results
- Field task scheduling
- Work online/offline
- Voice-capture inspection notes
- Markup plans and images onsite
- Capture site photo & video
- Drone media support

**Field Access** – Building Inspectors, code enforcement tasks.

**First Response** – Fire, Police, HAZMAT, disaster management access and inspection.

**EHS** – Environment, Health and Safety

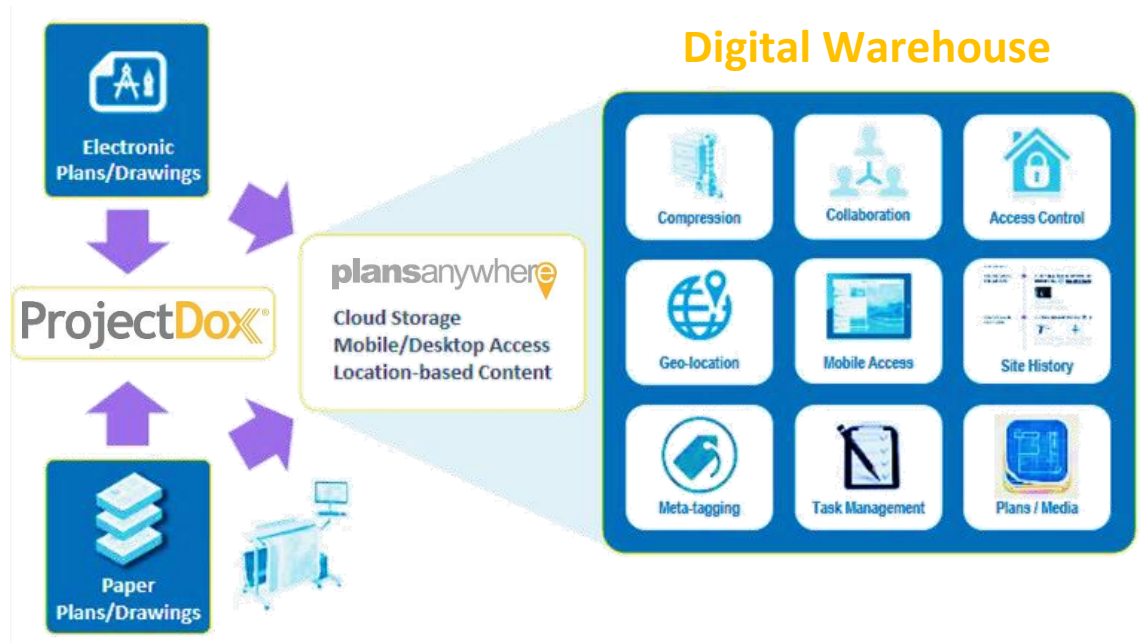

## PlansAnywhere Supports Your Goals:

- ✓ **Greater Community Safety**  
better inspector efficiency
- ✓ **Better Emergency Response**  
Full site knowledge
- ✓ **Built Environment Awareness**  
Know what's built where
- ✓ **Clean and Sustainable Environment**  
paperless electronic data access and storage

## Online or Offline Access from Anywhere

PlansAnywhere leverages the power of secure cloud storage, open data models and delivery technologies to enable field-to-office communication and collaboration to all built environment stakeholders. It is designed to allow for quick access to drawings and information originally created and held in ProjectDox by extending information to a digital warehouse where it can be easily accessed and stored. Plans are geo-located initially with Google maps.

*“Being able to give first responders access to a building’s up-to-date plans before they go in - especially with fire – is literally a life saver.”*

*“Access what you need, where you need it, when you need it. Our inspectors love it!”*

How can you improve safety in your community? Your inspectors’ efficient mobile access to information allows them to do much more in a day, and that improves the safety of the buildings and citizens in your community. When first responders have field access to site data, the response is faster and more informed - saving lives and property.

Our suite of complementary products is designed to bring efficiency and ease to the process lifecycle of submitting, reviewing, approving, storing and accessing building plans and data in your jurisdiction.

From submission to approval to accessible record.
