

Process Efficiency Software for Public Works

Avolve Software delivers process efficiency for plan review, change orders, multi-departmental collaboration and field access.

- Best-in-Class review workflows
- Auto task assignment, notifications, and accountability
- Secure drawing & markup version file management
- Change collaboration
- Revision compare
- Approval batch stamping

For projects involving:

- Building assets
- Public ROW
- Traffic, roads & bridges
- Utilities, water, sanitation

Better Collaboration – Faster Project Delivery

Why are more and more Public Works and Capital Improvement Departments depending on ProjectDox? Because ProjectDox provides “the single source of truth” for project management and collaboration. That means providing real time project access to the most current set of plans and documents to ensure all team members are working off the same set of plans. ProjectDox also maintains a separate, versioned archive of all legacy plan versions for reference and audit trail. If your department oversees capital projects, automating the plan management and review process will enable real time collaboration between all stakeholders and accelerate project delivery.

“We reduced review service from 7 to 3 days immediately after implementing ProjectDox ePlan technology.”

ProjectDox provides a true project collaboration environment for managing these projects, allowing project team members instant web access to all project data, while maintaining a fully versioned document history. All project data is permission-accessed and securely controlled for both internal and external team members. Once complete – ProjectDox maintains a working set of asset as-built plans to be utilized for ongoing maintenance and future development.

 paperless data access

PlansAnywhere is a mobile app and cloud-hosted, software-as-a service (SaaS) product. PlansAnywhere enables field access to view all key site information by a geo-location and gives total access to site history, eForms, task lists, and all site content including drawing plans, photos, videos and associated documents. Field personnel are content-enabled to more efficient, and can use the app to update/record site information, complete eForms as the site is being inspected. This information can additionally be useful downstream for first responders.

Field Access – Project Inspectors, safety enforcement tasks.

First Response – Fire, Police, HAZMAT, disaster management access and inspection.

EHS – Environment, Health and Safety

“Access what you need, where you need it, when you need it. Our inspectors love it!”
